Professional Summary

Experienced full stack developer with a strong background in building scalable e-commerce platforms. Proficient in modern JavaScript frameworks and backend development with a focus on performance and user experience.

Skills

JavaScript, React, Node.js, Express, MongoDB, REST API, Git

Experience

E-commerce Solutions Engineer at TechRetail Solutions (Mar 2023 - Present)

- Architected and developed end-to-end e-commerce platform for TechRetail Solutions. Implemented microservices for inventory, payments, and user management. Used React for a responsive UI, integrated MongoDB and Express for scalable backend. Collaborated with cross-functional teams and led sprint planning using Agile methodology.

Full Stack Developer at Digital Commerce Inc. (Jan 2023 - Present)

- Led the development of a scalable e-commerce platform using React and Node.js. Designed and implemented RESTful APIs for product, user, and order management. Integrated Stripe and PayPal for secure online payments. Implemented real-time order tracking and user authentication with JWT.

Frontend Developer at RetailWave Solutions (May 2022 - Dec 2022)

- Worked on the redesign of an e-commerce site using React, improving load time by 35%. Collaborated with UX designers to enhance product browsing and checkout flows. Used Git for version control and contributed to agile sprints.

Web Developer Intern at ShopSmart Tech (Jan 2022 - Apr 2022)

- Assisted in developing an inventory management system for a small e-commerce business. Implemented product CRUD operations and integrated basic payment gateways.

Education

M.S. in Web Engineering & E-commerce Systems, Global Tech University (Graduated 2023)

Projects

Online Marketplace Platform

- Built a full-featured marketplace platform allowing users to browse, search, and purchase items. Features included shopping cart, checkout with payment gateway, and user order tracking. Stack: React, Node.js, Express, MongoDB, Stripe API.

Multi-Vendor E-commerce Dashboard

- Developed an admin dashboard for managing vendors, products, and orders. Included analytics and role-based access control. Integrated REST APIs with secure authentication.
